# HOLLINDIA INTERNATIONAL B.V.

Hollindia International B.V. is an international organization and has been involved in the colour business since 1985. The dye and pigment industry at that time was obviously changing from a multinational dominated scenario to one of several sources, both western and oriental. There was a function as an intermediate, and Hollindia would endeavour to fulfil this function.

Starting as a commission agent and proceeding to trade for its own account, Hollindia is now a group of Companies which has done its share of backward as well as forward integration.

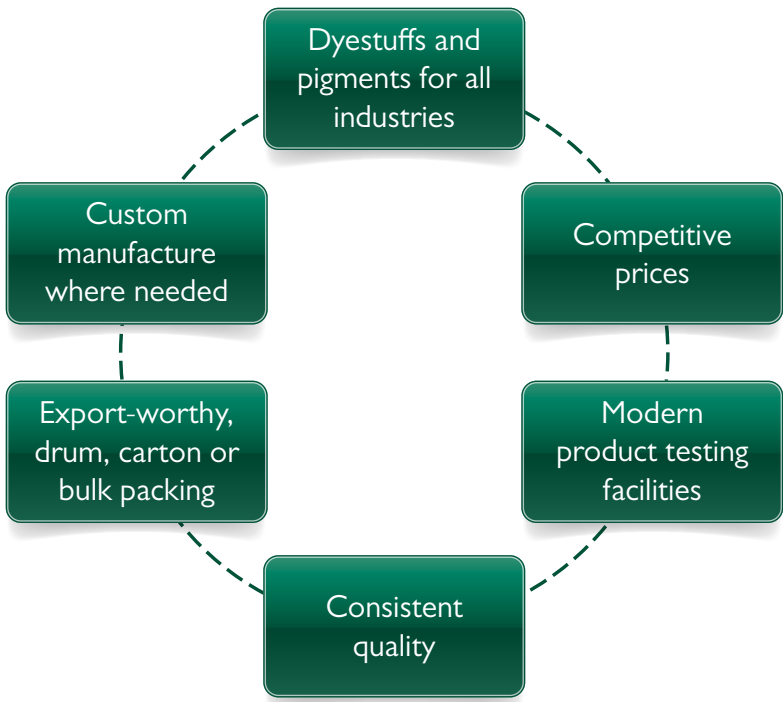

Today we deal in dyestuffs for the textile, leather, paper and food industries as well as pigments for the plastic, printing ink and paints industries. We have manufacturing and standardization facilities in the Netherlands, Poland, China and

India and warehouses and sales offices in the Netherlands, Poland, Morocco, Ivory Coast, UAE (Dubai), China, India and Bangladesh.

Further, Hollindia International's joint ventures and close associations with other producers, strengthened by our involvement in the colour intermediate business also differentiates us.

## OUR STRENGTHS

## PRODUCTS & APPLICATIONS

### Pigments

- Organic Pigments
  - » Azo Pigments
  - » Pthalo Pigments
  - » High Performance Pigments
- Inorganic Pigments
- Special Effect Pigments
